

SEISMIC SWITCH, INC.

Introducing our new

ELECTRONIC EARTHQUAKE DETECTOR WITH SELECTABLE TRIGGER

For 50 years Seismic Switch Inc., has set the industry standard in elevator seismic ground motion detectors with the reliable electronic Model CHV-2. We are pleased to announce the CHV-2 has selectable options.

Model CHV-2

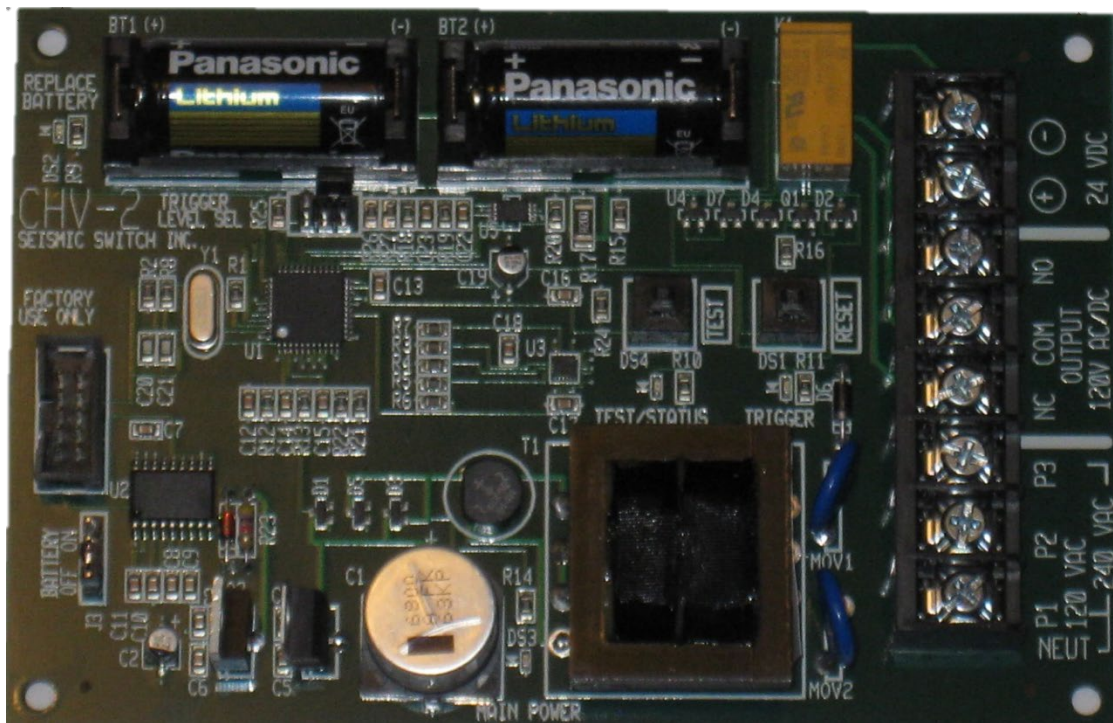

Made in USA

- Fail-safe operation – any malfunction causes trigger; no “dead detector” problems
- Most economical Seismic Switch on the market
- Includes built in battery backup and latching earthquake memory
- Simple, quick and easy installation
- No special wire or cables needed
- No calibration ever required
- Selectable levels

SEISMIC SWITCH, INC.

889 4th Street, San Rafael, CA 94901 • Tel (415) 492-1200

Email: seismic@seismicswitchinc.com • Website: www.seismicswitchinc.com

FEATURES:

- 3 axis accelerometer: all-digital design can be mounted in any position
- Accuracy: .001g (1 gal); no calibration required
- Indicator lights for power, low battery, trigger and test
- Minimum 100 hour battery life in power failure
- Custom software with selectable trigger levels and complete built-in self test
- Easy to replace and inexpensive long life lithium batteries
- 120 VAC, 240 VAC, 50 or 60 HZ and 24 VDC inputs
- U.L. 508 listed Industrial Control Switch (File E350688)
- 120 Volt output, 0.6 amp, AC or DC resistive, 30 Volt DC output, 2 amp
- Rated from 0° C to 70° C • Enclosure is 6" x 8" x 3" with easy mount flanges
- Weight =3 lbs.
- New, simplified BATTERY on-off jumper
